Subject: Location of Athletic Facilities at Flower Mound High School

Background Information:

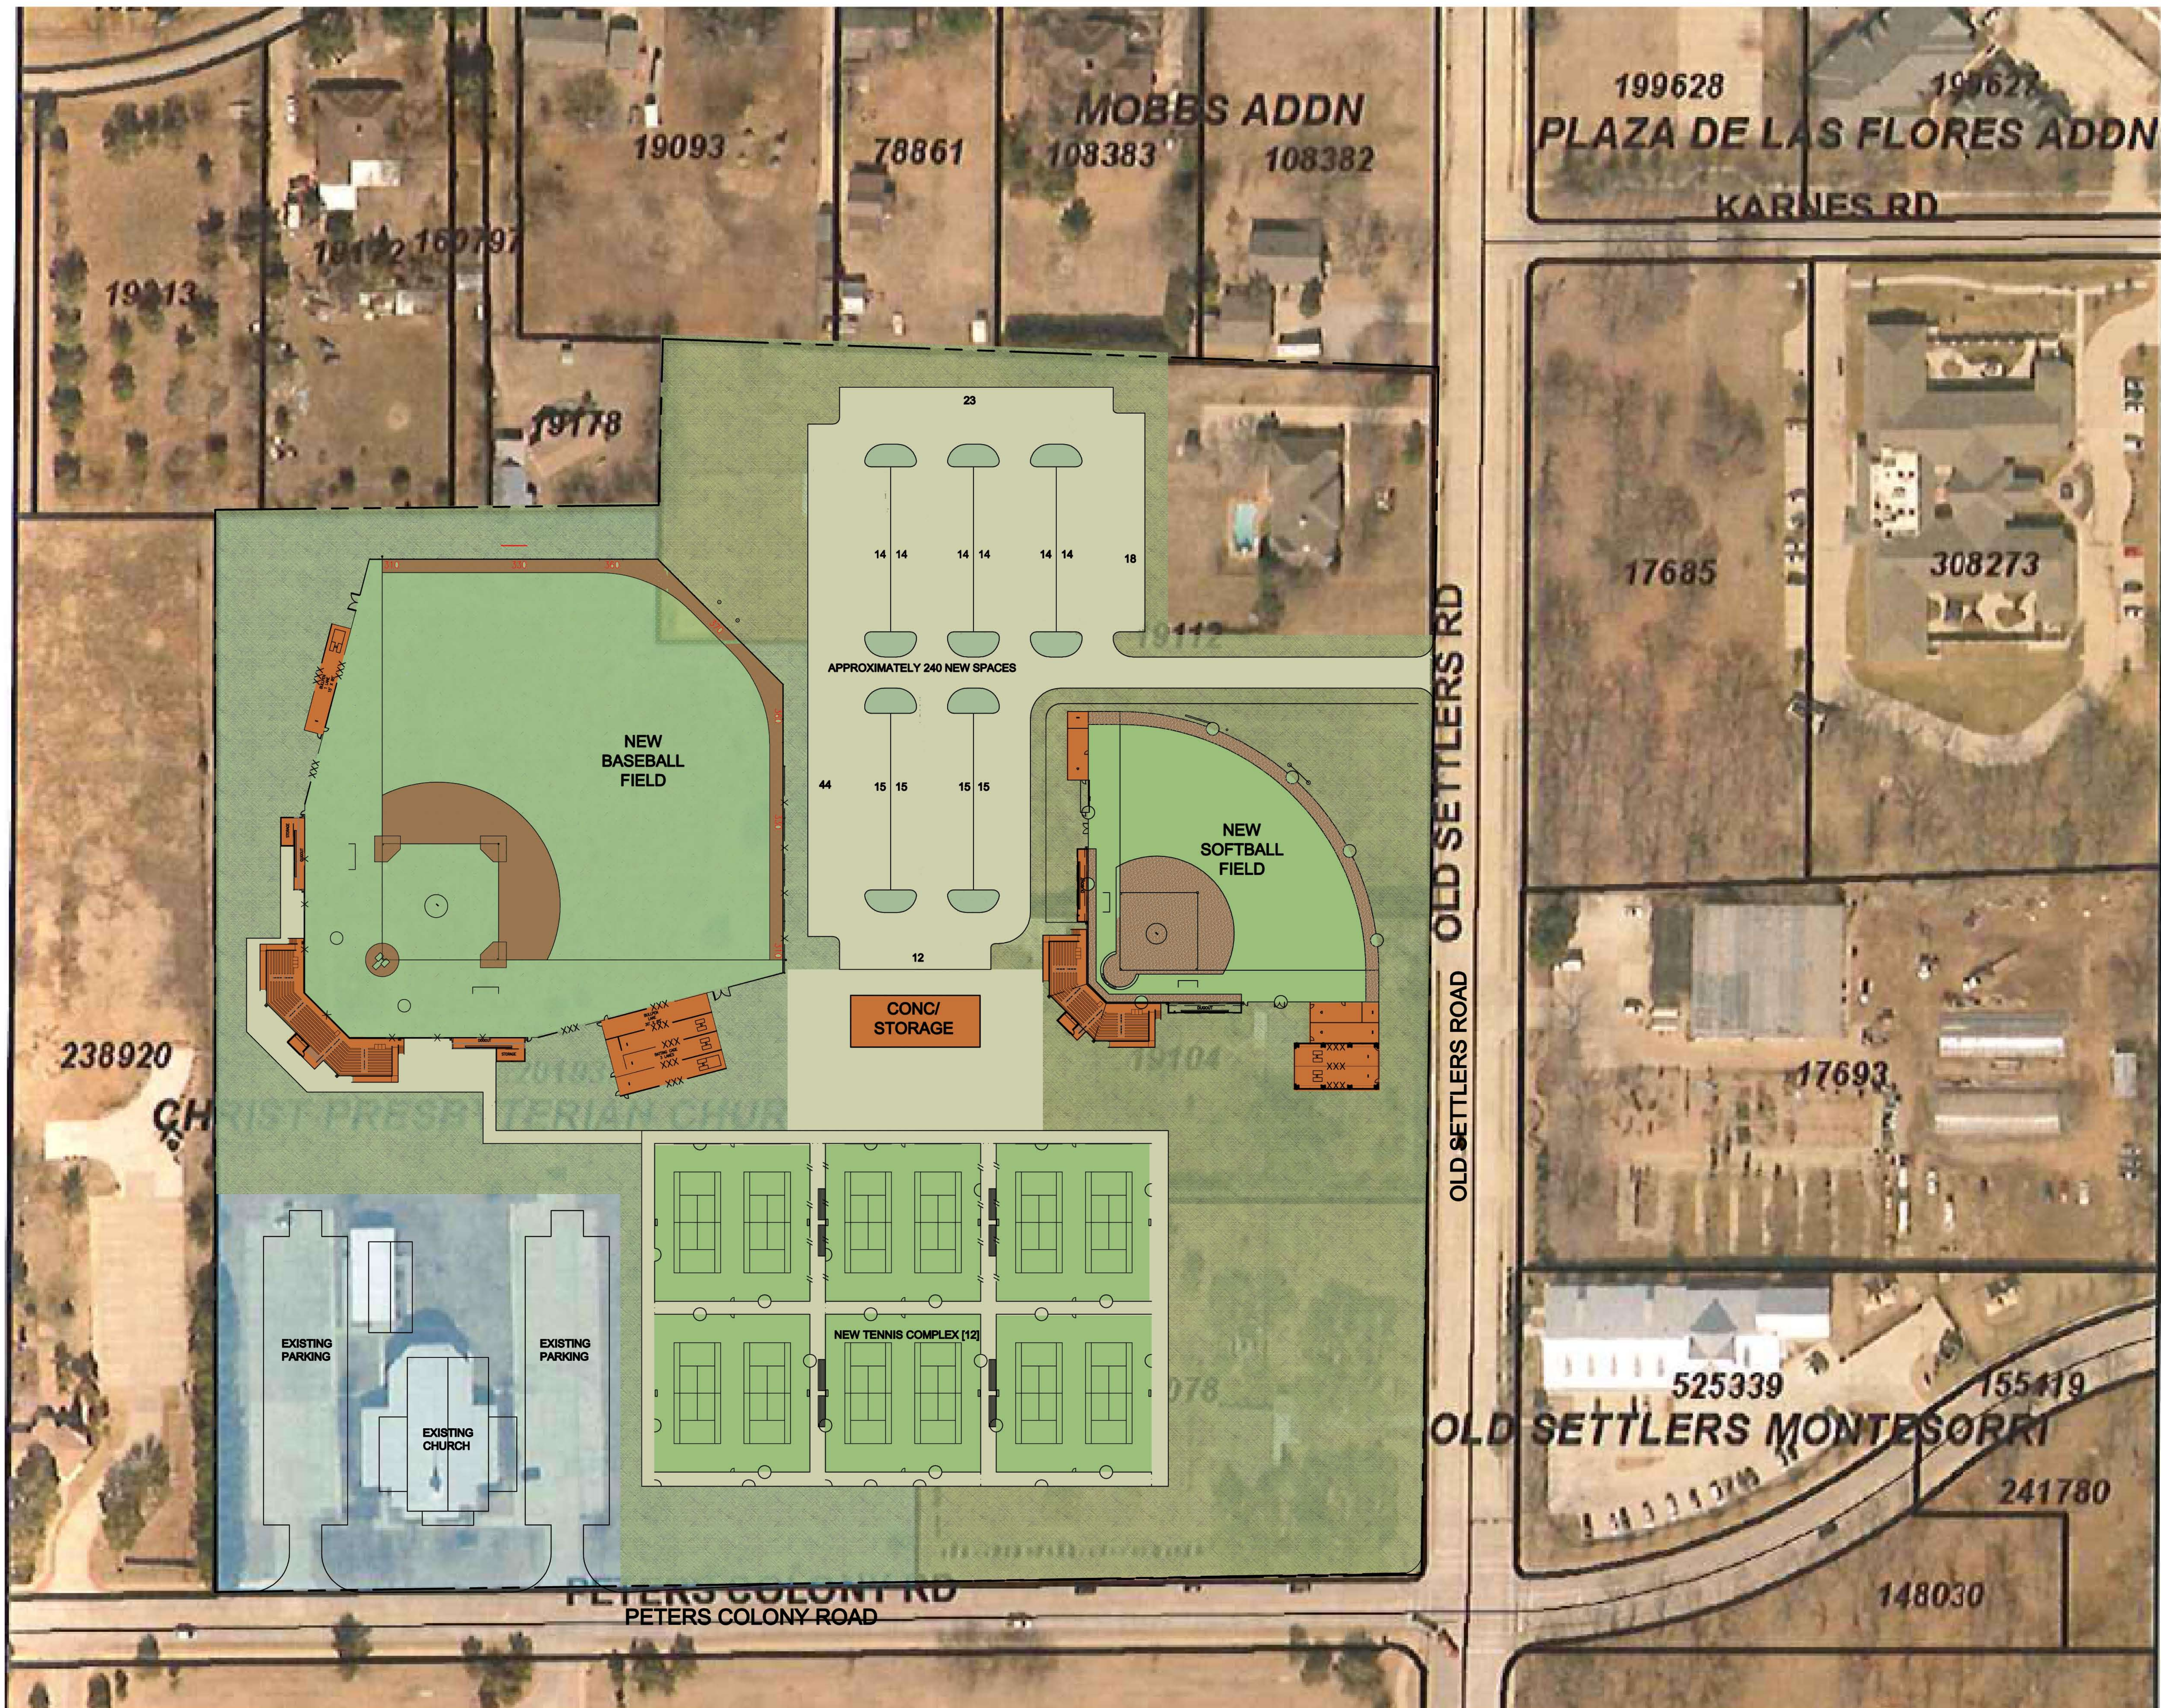

- To develop the Ninth Grade Center at Flower Mound High School relocation of the athletic fields—baseball, softball, and tennis courts—was necessary to have enough room for the project.
- At the August Board meeting PBK Architects presented the Design Development phase of the project, but the site of the athletic fields was not finalized pending the acquisition of the site.
- Representatives from PBK Architects will be at the meeting to discuss the plans further.

Administrative Consideration:

- The attached drawing represents the initial concept of the fields and courts. The plan will be refined after the site and topological surveys are completed.
- Further discussions will be needed as plans for vehicle and pedestrian traffic are incorporated into the designs as well.

Strategic Design:

- Strategic Design Goal # 1 requires that safe, nurturing, inclusive, and flexible learning environments be provided for all learners. The athletic and physical education programs of the school depend upon high quality programs and spaces that will be provided in this project.

FLOWER HIGH SCHOOL - SPORTS COMPLEX

Conceptual Site Plan
